CARE AND MAINTENANCE

Mastic Home Exteriors by Ply Gem Gutter Coil and Related Accessories are some of the most durable building product materials available today for residential applications. In most cases, normal rainfall is sufficient to keep them clean. But if your Mastic Home Exteriors Gutter Coil and Related Accessories should need cleaning, we recommend the following procedures. Particular attention should be given to areas that have limited exposure to the natural washing effect of rainfall.

1. **Moderate Atmospheric Dirt** — We recommend an occasional washing with clear water using a garden hose and soft-bristled brush (a long-handled, car-washing brush is ideal for this purpose).
2. **Heavy Industrial Atmospheric Dirt** — Wash in the manner indicated above, but use the following solution:
 - a. 1/3 cup detergent (Tide®, for example)
 - b. 2/3 cup trisodium phosphate (Soilax®, for example)
 - c. 1 gallon water
3. **Mildew Accumulation** — Mildew can collect on surfaces of all types of building products and is often evident on surfaces that have not been properly cared for and maintained. Normally, mildew will appear as black spots. Mildew is easy to remove by using the following solution:
 - a. 1/3 cup detergent (Tide®, for example)
 - b. 2/3 cup trisodium phosphate (Soilax®, for example)
 - c. 1 quart sodium hypochlorite 5% solution (Clorox®, for example)
 - d. 3 quarts water
4. **Caulking Compounds, Tar and Similar Substances** — Use mineral spirits in reasonable amounts and apply directly to the foreign substance. Immediately after cleaning, rinse the area thoroughly with water.

CAUTION: Do not exceed the recommended concentrations of cleaners. To do so can cause damage to the Products' surface. Avoid skin and eye contact with the solution, and in all cases follow manufacturers' instructions for the use of cleaning compounds and solutions. Avoid use of abrasive-type cleaners and strong solvents. Test any cleaner on an inconspicuous area before applying to major areas. To minimize streaking, always clean from the bottom to the top and follow with a rinsing of clear water. Excessive scrubbing is unnecessary and can be harmful to the Products, and may cause undesirable glossy areas over the finish.

FACTS ABOUT THE INSTALLATION OF MASTIC HOME EXTERIORS GUTTER COIL AND RELATED ACCESSORIES

We designed and manufactured Mastic Home Exteriors by Ply Gem Gutter Coil and Related Accessories to perform best when installed by qualified applicators. While Mastic Home Exteriors does not assume responsibility for installation of its products, it does keep installers informed on new techniques and provides detailed installation instructions on all of its products. We frequently update our installation manuals with new and improved methods of application.

You should discuss any product adjustments with the dealer or applicator who did the work. These adjustments can best be made by the original dealer or applicator, since he or she is most familiar with your particular installation.

NOTE: Direct contact of aluminum products with certain dissimilar materials, or contact with water run-off from dissimilar materials, is likely to result in corrosion. Accordingly, care should be taken during installation to avoid contact of aluminum with dissimilar materials including: dissimilar metals (e.g. copper, zinc, steel, etc.), concrete, stucco, asbestos siding, pressure treated/pretreated lumber, roofing materials or roofing systems containing metallic granules or strips, or corrosive non-metallic materials.
